

CORPORATE SUSTAINABILITY POLICY

The spirit behind TTSL's Mission statement, **"To empower every Indian to connect with the world, affordably"**, is what drives TTSL's Corporate philosophy as well. We therefore, undertake to work for the well-being of the communities in which we operate. Towards this, the main elements of TTSL's community development policy are to:

- >>> Implement sustainable, replicable and scalable development models that create a measurable socio-economic and/or ecological impact in the areas of TTSL's influence
- >>> Partner and network with development agencies and NGOs to implement appropriate community development programmes
- >>> Assess the environmental impact of our products / operations - this includes vendors and supply chain, in the process. TTSL commits itself to promote appropriate Environment Management Systems in order to reduce its global impact on the environment
- >>> Assess the social environment we function in, to improve accessibility of underprivileged to ICT resources, thereby bridging the digital divide and using the telecom technology platform to provide access to learning and skills
- >>> Commit ourselves to transparency and open communication about the environmental and community development initiatives
- >>> Involve employees in volunteering for community development programmes
