TTBS provided the customer with an L3 MPLS VPN solution to connect their 20 branches in Surat with DC and DR.

Routers were provided to the customer by TTBS as part of their end-to-end Managed Services.

The solution was cost-effective, highly scalable, and could be customised for any future requirement of the customer.

The solution allowed the bank to connect securely with Cloud Service Providers (CSP) like Microsoft Azure and Amazon Web Services at any time over a private network.

Segment: BFSI – Co-operative Bank
Solution: Smart VPN
Highlight: Co-operative bank enjoys better connectivity with multiple remote locations

OVERVIEW

The customer is a cooperative bank based at Surat, Gujarat. They provide banking facilities to the shopkeepers at the Surat Textile Market to help them start and manage their business.

CHALLENGE

The customer was looking for a reliable partner who could provide a secured private connectivity solution within their 20 branches using DC and DR Architecture. They wanted a single service provider with a fully managed & cost-effective solution to connect their remote locations.

SOLUTION

- TTBS provided the customer with an L3 MPLS VPN solution to connect their 20 branches in Surat with DC and DR.
- Routers were provided to the customer by TTBS as part of their end-to-end Managed Services.
- The solution was cost-effective, highly scalable, and could be customised for any future requirement of the customer.
- The solution allowed the bank to connect securely with Cloud Service Providers (CSP) like Microsoft Azure and Amazon Web Services at any time over a private network.

BUSINESS BENEFITS

- Comprehensive Partner: TTBS provided fully Managed Services, resulting in lower TCO and no Capex for the customer
- Scalability: The customer can add additional locations easily without changing the infrastructure at the Hub ends.
- Cloud-Ready Solution: The MPLS network can be integrated with the CSP infrastructure over secure and private connectivity.

Solution Architecture

- Topology: Dual Hub and Spoke
- CoS-Premium
- CE-PE Routing Protocol: Static
- Termination Interface: Ethernet
- Solution Type: Managed
- MPLS PoP
- CPE
- MPLS Port Bandwidth
- VRF-1
