

Why Internet Leased Line is Ideal for Business Data Connectivity

Internet Leased Line

Direct data connectivity solution between the service provider and a business having ≥ 15 employees

Fibre-based private data circuit with speed up to 10 Gbps

Can connect multiple premises and locations

For regular web conferencing, large file uploads and data streaming at peak times

Business benefits of ILL

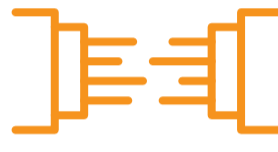

Performance

Reserved connection tunnel with no congestion or slowdown

Bandwidth

High bandwidth with enough throughput for all employees to be online simultaneously

Reliability

99.5% SLA, latency commitment and packet loss at < 1%

Security

Runs directly between service provider and business; can be smoothly integrated with UTM

Flexibility

Ease of increasing bandwidth whenever high volumes of traffic are expected

Last Mile Reach

Widespread last mile network to reach offices across the country

Difference between ILL and Broadband Connection

Internet Leased Line

Parameters

Broadband

Dedicated exclusively to the subscriber

Network Capacity

Shared between users in the area with a common network

Symmetrical for downloads and uploads

Speed

Uploads slower than downloads

Consistent network speed

Stability

Inconsistent speed due to network sharing

Unlimited data

Data Availability

Capped – additional charges or throttled speed on exceeding plan's limit

SLA-backed with 24*7 support

Service & Support

Up to 2 working days' turn-around-time to fix issues
